

Australia's favourite outdoor blind

www.ziptrak.com.au

Transform your
entertainment
area in seconds

Ziptrak® Sunscreen Mesh blind with
Traditional Pelmet in Classic Cream.

Instantly create a brand-new space in your home, ready to entertain family and friends at a moment's notice

Offering protection during every season from UV, dust, wind and rain for year-round outdoor entertaining.

- Custom made for every installation.
- Protection from the elements.
- Effortless and easy-to-use.
- Child-safe; no cords, ropes or wires.
- Australian made and patented design.

Ziptrak® Clear PVC blind with Cast Bracket in white.

Enjoy your privacy without compromising the view

Enjoy a sense of privacy while preserving your external views with the use of modern Sunscreen Mesh fabrics. Or for uninterrupted views and maximum rain protection choose clear PVC with your Ziptrak® blind system.

Maximise the use of your outdoor space

Spend more time with family and friends enjoying the outdoors regardless of the weather. Ziptrak® blinds help you extend the use of your outdoor entertainment areas by capturing warmth during the winter months or allowing fresh breezes to flow through during summer.

Ziptrak® creates a barrier from weather, insects, dust, leaves and other debris and reduces the time spent on cleaning and maintenance of your outdoor area and furnishings.

The unique design combination of the Ziptrak® blind system with a Streamline Pelmet containing our Insect Control System adds an additional barrier that other outdoor blinds cannot offer.

Streamline Pelmet with Insect Control System

Ziptrak® Sunscreen Mesh blind with Traditional Pelmet in Woodland Grey.

Effortless smooth operation

Ziptrak® Spring-Balanced technology permits effortless smooth operation. Simply push the blind up or pull the blind down and your Ziptrak® blind will stay where you leave it. You can also lock your blind into place by pushing down into the lowest position and engaging the Ziptrak® Centre-Lock-Release mechanism. To unlock, lift the handle to activate the release latches and lift.

Optional motorisation is also available – with remote control instead of manual operation, useful for multiple blind applications or installations in hard to reach locations like outside of windows or heights.

Designed for all the family

The Ziptrak® patented Track-Guided Blind System with its unique spline binding creates a gapless barrier on all sides of each blind – keeping out dust, wind, rain and insects. Our design also presents a safe environment for children and pets with no cords, crank handles, zips or external wiring.

Spring-Balanced Technology

- One-touch convenience
- Quick and easy-to-use
- Leave at any height

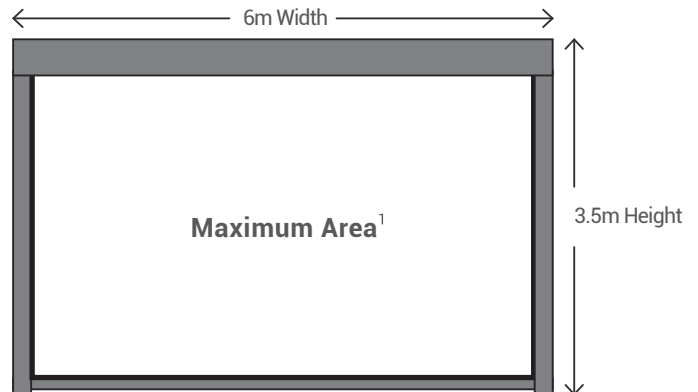

DESIGN YOUR BLIND

1 Made to order sizing

Each Ziptrak® blind is custom made and installed to your individual needs and specifications. With a wide variety of colour options, styles and features available to match or complement your outdoor space.

Need a larger blind or would like to include a doorway? Ask your retailer about the Ziptrak® Removable Post System.

2 Select the skin type

*Sunscreen Mesh - Privacy and Protection

Provides a high degree of privacy, reduces sun glare, and allows airflow. For year-round protection from the harsh weather - with up to 99% UV and 96% wind block.

*Clear PVC - Uninterrupted Views

Allows for maximum views and rain protection. Keeps the warmth in during winter while blocking up to 93% UV.

3 Select the hardware colour

Ziptrak® aluminium componentry is readily available in six colours or can be powder-coated to any conceivable colour to match the décor of your existing outdoor area.

¹ The recommended maximum dimensions for Ziptrak® blinds are 6000mm wide by 3500mm high when using Sunscreen Mesh, or 5500mm wide by 3500mm high when using clear PVC. * Sunscreen Mesh and PVC products are complementary to the Ziptrak system but are not manufactured or sold by Ziptrak Pty Ltd. Please speak with your retailer about the range, warranty and technical specification of these products. We recommend making your selection after viewing actual product samples in your outdoor area. Varying light conditions and printing processes can affect colour tones represented in this catalogue.

4 Choose from the Pelmet or Bracket options

Streamline Pelmet with Insect Control System

Provides exceptional protection from the elements, ensuring your blinds look great and operate flawlessly for years.

Traditional Pelmet

Conceals and protects the blind when retracted.

Cast Bracket with Back Flashing

Hides the blind from view on one side only.

Cast Bracket

Holds the blind in place but leaves it unprotected from the elements.

5 Choose from the Bottom Bar Weather Protection options

Standard Weather Strip (15 mm)

Provides superior weather protection while closing gaps effectively.

Large Weather Strip (30 mm)

Blocks weather and other debris when large gaps are present.

Custom-Made Skirt

For acutely sloping surfaces your retailer can offer a custom-made skirt.

Basic Bottom Bumper

Prevents surface damage but does not provide weather protection.

6 Choose either manual (Spring-Balanced) or motorised operation

Centre-Lock-Release Mechanism (exclusive for manual operation)

Front Handle

Lock your blind in place when fully down (closed).

Reverse Handle

Add an extra handle to unlock the blind from the other side.

Pull Stick

Request a pull stick to avoid reaching up high or bending low to operate your outdoor blind.

Motorisation

Ask your local Retailer for details about convenient motorisation and SolarSmart™ options, only available with Sunscreen Mesh.

UVR Protection: The amount of UV Radiation that is transmitted through a fabric. Mesh fabrics can block up to 99% of UV Radiation depending on individual technical specifications. This is important when considering protection of outdoor flooring, furnishing fabrics and furniture against fading. **Privacy:** The openness or proportion of holes in woven fabrics affects the degree of visibility. Dark colours may provide outgoing visibility with daytime privacy whereas light colours offer greater heat protection efficiency but with lower privacy. **Wind Protection:** The amount of wind that can pass through the blind when completely closed. The amount of wind blocked by the system will vary depending on the type of fabric and blind configuration selected. ¹ Testing performed by the University of Adelaide showed that the Ziptrak® Blind System of 2.5m by 2.5m can resist a wind loading up to 82.4km/hr when installed with aluminium rivets and up to 139km/hr when installed with stainless steel rivets. Installation is crucial to determining the performance of a blind in windy conditions. For commercial applications, and in areas prone to high winds, we recommend a greater number of fixings to the mounting structure. It is recommended that stainless steel rivets be utilised between the track and channel. ² Sunscreen Mesh and PVC products are complimentary to the Ziptrak® system but are not sold or manufactured by Ziptrak Pty Ltd. Technical specifications can differ between products. Please speak with your retailer about the range, warranty, and specifications of these products. We recommend making final selections after viewing actual samples. * Pressure on Sunscreen Mesh fabrics due to wind and rain conditions can increase water penetration through these fabrics.
